

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

FOREWORD.

For a long time we have realized the pressing need of a catalogue of general Catholic literature, one that would contain the books of all the Catholic publishers, as well as those obtainable from other sources. It seems to us opportune that such a catalogue should be forthcoming, especially at this time, when movements for more extended reading of Catholic literature are general throughout the country. For the purpose of supplying this need, we take pleasure in presenting what we believe to be the most complete catalogue and price-list of general Catholic literature published in the United States. It is not our purpose to include all books by Catholic authors, such as for example, books of merely local interest, or technical books as such, but only those that are of general interest to Catholic readers. In addition, we have included a limited number of books by non-Catholic authors, which by their worth we consider entitled to a place in this list. Such books are designated by the letters (N.C.) near the author's name.

Important! Please read carefully.

☞ Hereafter, early in each year, it is our intention to issue a supplement to this catalogue, containing the books published during the preceding year, as well as a record of those that have passed out of print. Thus those who preserve the catalogue and supplements will possess a complete list of current Catholic literature. On receipt of five cents in stamps we will mail the annual supplement to any address. Get your name on our mailing list.

☞ We shall be pleased to furnish, upon request, information concerning any book in this list, that would be supplied by a descriptive catalogue.

☞ We carry the most complete stock in the United States, and all orders sent us will be filled without unnecessary delay.

☞ The prices in this catalogue are strictly *net*, and do *not* include postage.

☞ In ordering books by mail, add ten per cent. for postage; thus a book marked 50 cents will be sent post-paid for 55 cents, a book marked \$1.00 for \$1.10, and so on.

☞ All books are bound in cloth, unless otherwise specified.

☞ Prices subject to change without notice.

☞ Special terms for Library orders. Get our figures before purchasing elsewhere. It will pay you.

☞ We respectfully solicit your patronage, and guarantee prompt and careful attention.

LATIN WORKS.

Canon Law—Liturgy and Rubrics—Philosophy— Scripture—Dogmatic Theology—Moral Theology—Miscellaneous.

 *All Latin Works are listed under Authors' names.*

As no Catholic book-store in the United States carries a complete stock of Latin works, it becomes necessary to import very many of them. We have direct connections with the chief sources of supply in Rome, Paris and London, and our facilities for importing these books with the least possible delay, are the very best. A very complete stock of the Latin books commonly used in our Seminaries and colleges is constantly on hand, and the editions are always the latest.

PATENT CANDLE-SPRING FOR CANDLE TUBES.

This spring is positively the best thing of the kind now in the market. It is made of the best piano wire, and there is no danger of the spring becoming clogged. It is connected at the bottom with a ring and chain, so that the spring can be pulled up and down, and cleaned out very readily. The candle is put in at the side. The top is permanent, so that there is no danger of the candle flying out, as often happens with some of the springs now in use.

This spring has given the greatest satisfaction wherever it has been used, and fills a long-felt want.

It is made of a size to fit the ordinary candle tubes now in use. One special advantage of this spring is that you do not have to get a special candle to fit it. The ordinary full weight 6 to the pound, or stubs of 4s can be used.

Price, per set of 6 \$4.50
